

# DATA WAREHOUSE SCOPING SERVICE

## OVERVIEW

We provide one of our leading consultants with at least 10 years' experience in Data Warehouse development to assist you in scoping and estimating your Data Warehouse project using our proven tools and methodology.

## OUTCOMES

- High level data warehouse design in the form of a Data Warehouse matrix.
- Work breakdown structure for project planning.
- Project cost estimate.

## PROCESS

We help you gather and understand your Data Warehouse requirements and interpret those requirements into a high-level Data Warehouse design. We then use the high-level design to define a project work breakdown structure and cost estimate.

Resources we use:

- Existing example reports and dashboards.
- Any requirements documentation.
- Read only access to live Source Systems, and any client tools required to access them.
- A high-level business overview.
- A copy of the Strategic Plan, including KPIs.

Who we involve in the process (if available):

- Project Manager.
- Technical resource who understands schema of source databases/files etc.
- BI/DW developers and Business Analysts.
- Stakeholders and End Users (or someone who knows their requirements).

## COST

We offer this service at a fixed price. A free one hour consultation is offered to understand your environment and needs, before providing the fixed price quote. Approximate cost is between \$US 5k to \$US 10k.

## NEXT STEPS

Please contact us via email at [contact@dimodelo.com](mailto:contact@dimodelo.com) if you would like to discuss this service further.
